Sub: Disclosure under Regulation 30 of SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 – Receipt of Order valued at **Rs. 84.00 Crores**

Pursuant to Regulation 30 of SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 we would like to inform that the Company has received an Order from Medical Education and Ayush department , Directorate Medical Education and Research , Mumbai , Maharashtra for Mobile CT – OmniTom Elite on Turnkey basis to be supplied at 6 prominent Government Medical colleges across Maharashtra

A mobile CT scanner is a compact, portable version of a traditional computed tomography (CT) scanner. It uses X-rays to create detailed cross-sectional images of the body and can be moved to various locations within a hospital or even between facilities. Unlike fixed CT scanners that are housed in dedicated radiology suites, mobile CT scanners are designed to be flexible, allowing for imaging in diverse settings like:

- At the patient's bedside: Ideal for critically ill patients who cannot be moved.
- In the operating room: Provides real-time imaging during surgeries.
- In emergency or trauma units: Enables fast diagnosis and treatment, especially in urgent cases like stroke or head trauma.
- In field or remote locations: Some mobile CT scanners can be deployed in ambulances, military field hospitals, or rural healthcare settings.

Mobile CT scanners are particularly valuable in neurosurgery, oncology, critical care, and trauma settings due to their ability to provide immediate, on-site imaging without needing to transport patients to a radiology department.

The requisite details pursuant to Part B of the SEBI Circular dated July 13, 2023 is annexed herewith.

Kindly take the above information on record.

Thanking You  
For, Aprameya Engineering Limited
